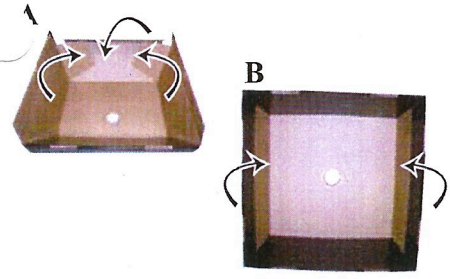
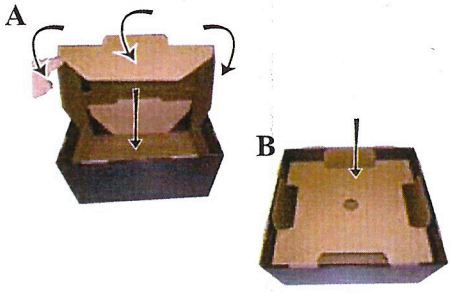
Set-Up Instructions - Super Mario Galaxy Display P/N 64649A

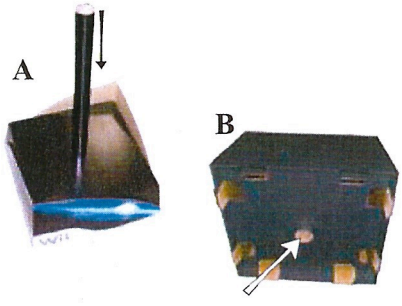


1) Locate the base. Square up sides. (A) Fold the small tabs in and the side panel over the tabs. Remove twinstick backing and press firmly to the inside. (B) Remove twinstick backing on remaining short side tabs and press to the inside of the base.

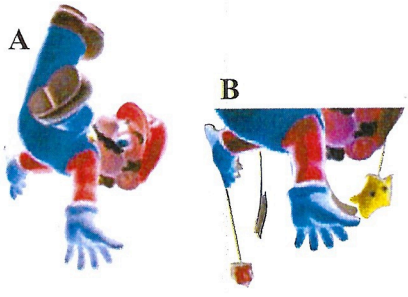


2) (A) Fold the sides of the support panels in. (B) Slide the support into the base. Turn base over.

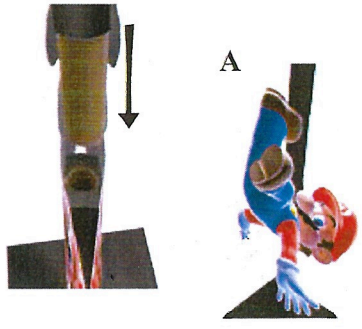
3) Unfold the base shroud. Slide it over the base. Press down even with floor.



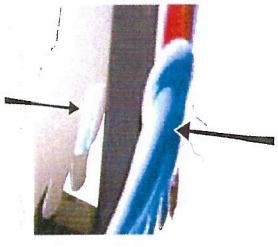
4) (A) Place female pole in the hole on top of the base. (B) Make sure to push it all the way through the bottom of the support.



5) (A) Locate Mario. Locate hole placements for dangler stars. (B) Place one star with a long string and two stars with short strings in these locations.

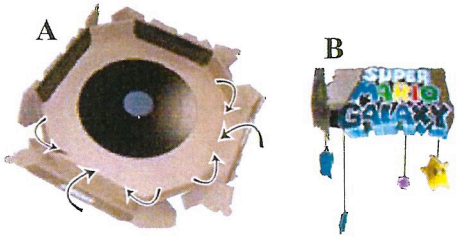


6) Place the Mario, feet up, over the pole. Make sure the hole on the center support is lined up to the hole on the pole. Place male pole into female pole to lock Mario in place. It should resemble (A) when assembled correctly.

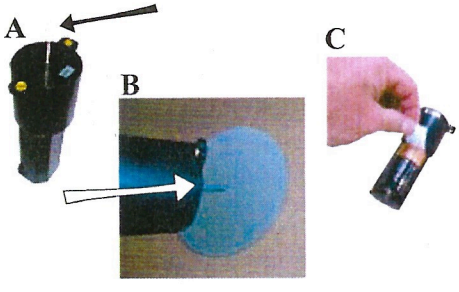


7) Remove the backing from the twinstick (located behind Mario's left hand and the right foot). Press firmly against the pole.

8) Locate the two snipes (if applicable). Remove backing from twinstick. Press firmly against Mario's top foot. Repeat procedure on other side with second snipe.



9) Locate header and stars. (A) Fold small tabs in. Remove backing from twinstick. Fold panels over tabs and lock into place with twinstick. (B) Insert two stars with short strings into opposite corners of the header. Insert two stars with long strings into remaining opposite corners.



10) (A) Remove plastic tip from the metal post on top of the motor and set aside. (B) Insert metal post into the hole in the bottom of the header. Replace plastic tip on motor to lock header in place. (C) Remove the paper tab from the motor.

11) Place motor into the top hole of the pole.
